## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

There was no prior art found by the examiner that suggested modification or combination with the cited art so as to satisfy the combination of all the limitations in claims 1, 23, 31, and 35.

As to claim 1, the prior art of record, taken alone or in combination, fails to disclose or render limitations "a scanning control unit, associated with said sensing device, for controlling said sensing device to scan about said limited access space according to a pre-recorded program, said program selectable for said instance within said set and comprising instructions for moving said sensing device linearly along a track, for rotating said sensing device about an axis perpendicular to said track and for rotating said sensing device about an axis parallel to said track, thereby to configure said scan for said instance", in combination with the rest of the limitations of claim 1.

As to claim 23, the prior art of record, taken alone or in combination, fails to disclose or render limitations "a scanning control unit, associated with said sensing device, configured to control said sensing device to sense about the vehicle underside according to a pre-recorded program, said program being variable, between vehicle type, comprising instructions for moving said sensing device linearly along a track, for rotating said sensing device about an axis perpendicular to said track, and for rotating said sensing device about an axis

parallel to said track, said program thereby configuring said scan for specific vehicle type", in combination with the rest of the limitations of claim 23.

As to claim 31, the prior art of record, taken alone or in combination, fails to disclose or render limitations "a scanning control unit, associated with said sensing device, for controlling said sensing device to scan about said limited access space according to a pre-recorded program, said program selectable for said instance within said set and comprising instructions for moving said sensing device linearly along a track, for rotating said sensing device about an axis perpendicular to said track and for rotating said sensing device about an axis parallel to said track, thereby to provide a scan which is specific to said space", in combination with the rest of the limitations of claim 31.

As to claim 35, the prior art of record, taken alone or in combination, fails to disclose or render limitations "a scanning control unit, associated with said sensing device, for controlling said sensing device to scan about said limited access space according to a pre-recorded program, said program being adapted for said member and comprising instructions for moving said sensing device linearly along a track, for rotating said sensing device about an axis perpendicular to said track and for rotating said sensing device about an axis parallel to said track, thereby to provide a scan specific for said member", in combination with the rest of the limitations of claim 35.
